

Yachtcharter Balearic Islands

Yacht charter in Baléares: Between Calas and Northern trade

Yacht charter Majorque

Among the most famous destinations in the Mediterranean Mallorca is of course very popular with sailors. All browsers receive a taste of adventure during their voyage around Majorca. Many picturesque bays invite you to take your time and lie at anchor. Mallorca, you can take the boat to the islands of Ibiza, Menorca and a license (previously requested) to visit Cabrera.

Cabrera

The Cabrera archipelago is located in the south of Majorca and consists of 17 islands, including the island of Cabrera as the main island. This entire group of islands is the 1991 National Park which represent an important part of the land area of the surrounding waters. This status as a national park has a number of laws that must be followed:

The Marine National Park requires prior approval, only 50 ships per day are allowed to visit the islands.
Lie at anchor in the national park is prohibited at the condition of using a mooring buoy.
The gangway is allowed only on the main dock, using only the dinghy.
Fishing is prohibited.
The scuba diving is allowed only with a permit and only in certain places.

The permit who authorise you to enter or to lie at anchor in the national park may be requested from the National Park Authority (Form here). Some charter companies can apply and request this permit for you. If you are interested to get it from us, please send us as early as possible your personal data including the passport number of the skipper and the required reservation days needed.

The authorization must be booked at least two days in advance, but can only be requested 20 days earlier of your arrival in the area. The cost of the authorization and the application will be paid locally.

Navigation climate in Spain:

More than 300 sunny days per year. Mallorca has an ideal climate to sail. The countless bays are incomparable with others!
The average winds from the Southwest can cause problems for an experienced recreational users to find the nearest port of certain regions. During the summer months, they can also contain up to 8 of the Beaufort scale and be strong.
